## Index

### A

- Air as circulation medium, 18
- Air foams, as circulation medium, 8
- Analog indicator, 46
- Analytical tests, 23–25
  - ash composition, 24
  - ash fusion temperatures, 24
  - ash yield, 23
  - calorific value, 24
  - chlorine, 24
  - dilatation tests, 24
  - free-swelling indices, 24
  - Gieseler fluidity, 24
  - Hardgrove Grindability Index, 24
  - maceral analysis, 24
  - moisture, 23, 36–37
  - sulfur, 23–24
  - trace elements, 24
  - ultimate analysis, 24
  - vitrinite reflectance, 24–25
  - volatile matter, 23
- Annular space, 46
- API gamma-ray unit, 46
- Apparent density, 30–31, 46
- Apparent rank, 37, 46
- Ash, 46
  - composition, 24
  - fusion temperatures, 24
  - variations, 20–22
  - yield, 23
- As-received basis, 31, 46
- ASTM D 388, 37
- ASTM D 1412, 34, 36
- ASTM D 2013, 34–35
- ASTM D 4371, 34–35
- ASTM D 5192, 1
- ASTM standards
  - drilling of soft or unconsolidated strata, 2
  - rock mechanics testing, 32
  - sample processing, 34
  - Attritus, 46

### B

- Banded coal, 46
- Bed-resolution density log, 47
- Bit blank, 46
- Bit crown, 46
- Bit footage, 46
- Book fashion, 29, 46
- Booting, 8, 46
- Borehole, 46
  - deviation, 14
  - erosion. See Caving
- Brazilian test, 32, 46
- Bulk density, 31, 46
- Bulk density log. See Density log

### Burrow, 46
- Button bit, 46

### C

- Calcium, in drilling fluid, 9
- Caliper log, 13, 46
- Calorific value, 24, 46
- Cathode-ray tube, core samples, 30
- Caves, 47
- Caving, 8, 47
- Chemical breakdown, by additives, 8
- Chlorine values, 24
- Classification, of coal, 37
- Coal
  - classification, 37
  - shifts in end purposes, 22
  - variability of parameters, 22
- Coal ball, 47
- Coal bed, 47
- Coal rank. See Rank
- Coal seam, 47
- Compressed air, as circulation medium, 8
- Concretion, 47
- Contamination, 47
- Conventional coring, 47
- Conventional drill core system, 3–4, 6–7
- Core, 18–19, 47
  - descriptions, 19
  - barrel, 47–48
  - rigid double-tube, 4, 6
  - single-tube, 3–4, 6
  - swivel-type double-tube, 6
- Core box, 28–29
- Core catcher, 47
- Core data
  - evaluation, 36–38
  - limitations on use, 36
  - variability, 37–38
- Core recovery, 25–26, 47
  - calculating, 18, 25–26
- Core run, 47
- Core sample, 47
- Core sampling, 20–29
  - book fashion, 29
  - core recovery, 25–26
  - field packaging, 26–29
  - flow diagram for division, 33
  - handling procedures, geophysical logging, 15–16
  - intact core handling, 27–28
  - limitations on data use, 36
  - lithotype and ash variations, 20–22
  - minimum sample mass, 25–26
  - mining methods and, 25
  - objective, 20
  - planning, 20
  - procedures, 26–27
  - purpose, 22–24
  - recombining splits, 20, 22
  - sample identification card, 27
  - vertical book fashion, 29
  - volumetric methods, 22
  - weighted methods, 22
- see also Analytical tests
- Core tray, 47
- Coring bits, 7
- Coring systems, 3–7
  - conventional drill core system, 3–4, 6–7
  - wireline drill-core system, 7
- Coulomb Criterion, 47

### D

- Data review, 36
- Density, drilling mud, 9
- Density log, 11, 13, 47
- Desorbed gas, 47
- Desorption, 47
- Deviation log, 47
- Deviation test, 32
- Double-tube core barrel, 48
- Drag bit, 48
- Drift, in drilling, 48
- Drill bit, 48
- Drill blank, 46
- Drill core. See Core
- Drill cuttings, 18
- Drill pipe, 48
- Drilling, 1
  - additives, 8
  - equipment choices, 2
  - fluid, 8, 48
  - characteristics, 9
  - cuttings, 18
  - mud, 8, 48
  - characteristics, 9
  - cuttings, 18
  - rigs, 48
  - drilling systems, 2–7
  - conventional drill core system, 3–4, 6–7
  - polycrystalline diamond cutter, 2
  - reverse circulation drill system, 2–3
  - rotary drill system, 2, 4–5
  - wireline drill-core system, 7
- Drill pipe, 48
