### Subject Index

**A**
- Abrasive blast cleaning, 79
- Access control, 89
- Acid cleaning, 80
- Aluminum and aluminum alloys, 48
- American National Standards Institute (ANSI), 117
- American Petroleum Institute (API), 117
- American Society for Testing and Materials (ASTM), 117
- American Society of Mechanical Engineers (ASME), 117
- Ancillary equipment, in oxygen-enriched environment, 5
- Aqueous and semiaqueous cleaning, 80
- ASME Boiler Pressure Vessel Code, 95, 97, 114
- Assembly, clean, 84–86
- Association of American Railroads (AAR), emergency procedures, 7
- ASTM D-2863, 28
- ASTM D-4809, 27–28
- ASTM G-63, 16, 53, 56, 59
- ASTM G-72, 28, 35
- ASTM G-74, 36
- ASTM G-86, 38, 40
- ASTM G-88, 57, 60
- ASTM G-93, 60
- ASTM G-94, 16, 49, 53, 59
- ASTM G-120, 81
- ASTM G-124, 16–17
- ASTM G-136, 83
- ASTM G-144, 83
- Authority having jurisdiction (AHJ), 124
- cleaning, 76–77
design, 57
designation/assignment of, 124
electrical wiring, 117
in emergencies, 6
facility maintenance, 99
facility planning and implementation, 90
hazard reviews, 132
inspection, 115
operating procedures, 81
oxygen detection, 97
personal protective equipment, 77
personnel, 87
piping systems, 66
pressure testing, 113
pressurization and purging of gases, 74
- safety inspection, 99
- transportation, 99–100
- weld testing, 114
- Autogenous ignition (autoignition) temperature of nonmetals data, 28–36, 37
test method, 28, 37, 38
- Barricades, oxygen propellant test areas, 98–99
- Blasts, 122–123
- Breathing applications, 4
- Building explosions, 121
- Bulk GOX and LOX storage nonpropellant use, 90–91
- propellant use, 90–91
- Burrs, 85
- Cadmium, 48
- Caustic cleaning, 80
- Central nervous system oxygen toxicity, 4
- 14CFR, 70
- 14CFR-171-180, 73
- 29CFR-1910.104, 67, 74, 90, 93, 96, 111
- 49CFR-171.8, 99
- 49CFR-172.101, 101-102
- 49CFR-172.700, 101
- 49CFR-173.31, 102
- 49CFR-173.115, 101
- 49CFR-173.302, 76
- 49CFR-173.318, 102, 113
- 49CFR-173.329, 102
- 49CFR-173.338, 102, 113
- 49CFR-177.840, 102, 113
- 49CFR-178.345, 101
- CGA 341, 73, 114
- CGA G-4.0, 66, 96
- CGA G-4.1, 81
- CGA G-4.3, 4
- CGA G-4.4, 57, 59
- CGA G-4.5, 4
- CGA P-1, 96
- CGA S-1.1, 70
- CGA S-1.2, 70
- CGA S-1.3, 70
- CGA V-6, 73
- Chemical cleaning, 79
- Chemical properties, 103–104, 103
- Chemical reaction, 14–15
- Chemical Transportation Emergency Center (CHEMTREC), 7, 104
- Chlorofluorocarbon (CFC), 81
- Cleaning, 76–86
- methods and aids, 77–81
- procedures, 81–84
- safety, 77
- specific materials, 84
- Cleanliness design for, 60–61, 60
- inspection and verification, 82–84
- levels, 76, 77–78
- maintaining in oxygen systems, 86
- maintaining through assembly, 85–87
- Clothing, in oxygen-enriched environment, 5
- Codes, regulations, and guidelines, 116–120
- Cold flow, seals, 59
- Combustion tests, 16–46
- Compatibility assessment, 132
- Component reassembly and functional testing, 84
- Composites, 49–50
- Compressed Gas Association (CGA), 117–118
- Compressed gas cylinders, storage and handling, 95–96
- Concept design review (CDR), 129
- Confined space, 87
- Contaminant-entrapping configurations, 60, 60
- Cooldown and loading procedures, 87–88
- Copper and copper alloys, 47–48
- Copper oxidation, 59
- Cryogenic cold-shock, 88
- Cryogenic injuries, 7–8
- Cryogenic oxygen systems, design, 70–74
- Deformable parts, 85
- Deionized water, 81
- Design approach, 57–58
- cleanliness, 60–61, 60
- component and system testing, 57–58
- components, 66–70
- fire management, 74–75
- guidelines for oxygen systems, 58–59, 59
- materials guidelines, 59–60
- minimizing ignition mechanisms, 61–66
- oxygen compatibility assessment, 57
- reviews, 57, 129
- risk training, 57
- specifications, 57
- Design certification review (DCR), 129

**NOTE:** This index cites entries from pages where substantive information is given about topics. Peripheral mentions of topics are not indexed. Entries marked with $f$ indicate figures; $t$ indicates tables.
Diluents, effects of, 50
Disassembly and examination, cleaning, 82
Document assessment results, 55
DoD 6055.9, 90–92
DOT Emergency Response Guidebook, 7
Drying, 83–84

E
EIGA IGC 33/0/E, 76, 81
Elastomers, 49
Electrical arc, 14, 65, 66f
data, 45–46, 46f
test method, 36, 45, 45f
Electrical design, LOX systems, 74
Electrical wiring and equipment, design, 70
Emergencies, 6–8
Emergency plans, 125
Emergency procedures review (OPR), 131
Emergency response, transportation, 101, 102
Emergency plans, 125
Emergency response, transportation, 101, 103
European Industrial Gases Association (EIGA), 118
Examinations, operating procedures, 88
Explosions, 121–122
Explosives, definition, 92
External heat, 15

F
Facility maintenance, 99
Facility planning, 89–100
general guidelines, 89–90
inspection, 99
testing, certification, and recertification, 99, 104–105
Facility repairs, modifications, and decommissioning, 99–100
Failure modes and effects analysis (FMEA), 130
Federal regulations
government organizations, 119
hazardous material, 116f, 118
Final cleaning, 82
Final design review (FDR), 129
Fire
design for management, 74–75
hazards inherent in oxygen systems, 16
ignition hazards in oxygen systems, 3–4
techniques for fighting, 8
Fire-extinguishing systems/agents, 98
Fire protection systems, oxygen-enriched environments, 97–99
Firstaid procedures, 7–8
Flow friction, 9–11, 12f
design, 64
Footwear, in oxygen-enriched environment, 5
Fracture, 13, 14f, 14t
data, 22–23, 23–24f
design, 65
test method, 17, 22–23, 22f

G
Gaseous oxygen (GOX)
bulk storage, 90–92, 91–93t
handling hazards, 3–4

H
Hastelloy, 47
Hazards
test method, 38, 40
design, 64, 64f
Heat of compression, 9, 11–12f
design, 63–64, 64f
Heat of combustion data, 28–35f
test method, 27–28, 27f
Head and face protection, in oxygen-enriched environment, 5
Health, hazards in LOX, 4
Heat of combustion data, 28–35f
test method, 27–28, 27f
Ignition-resistant materials, 59
Ignition tests, 16–46
Inconel, 47
Inspections, 83
Insuring associations, 118
Intermediate cleaning, 82
International Organization for Standardization (ISO), 118–119
Iron alloys, 48
Isopropyl alcohol (IPA), 81
Joule-Thomson effect, 106–107, 106f, 106t

K
Kindling chain assessment, 55
Leaks and spills, 6
Liquid air, 89
Liquid oxygen (LOX)
bulk storage, 90–92, 91–93t
component and systems design, 73–74
description, 9
disposal, 96
electrical design guidelines, 74
handling hazards, 3–4
piping system design considerations, 73
pressurization and purge gases, 74

L
Leak, 89
Liquids, 89
Liquid oxygen (LOX)
bulk storage, 90–92, 91–93t
component and systems design, 73–74
description, 9
disposal, 96
electrical design guidelines, 74
handling hazards, 3–4
piping system design considerations, 73
pressurization and purge gases, 74

O
Operational readiness inspection (ORI), 131
Operational readiness review (ORR), 131
Operational reviews, 131–132
Operator certification, 87
training review, 131

M
Magnesium, 48
Material compatibility assessment, 130
Materials
certification, 59
design guidelines, 59–60
flammability, ignition, and combustion, 16
metallic, 46–49
nonmetallic, 49–50
selection using oxygen compatibility assessment, 55–56, 56f
types, 49–50
weight and strength, 59–60
Mechanical cleaning, 79
Mechanical impact, 11–13, 13f, 13t
data, 34, 36, 41–44t
design, 64, 64f
test method, 38, 40
Medical oxygen, 4
Metallic materials, 46–49
Metal oxides, 49
MIL-PRF-25508G, 4
MIL-PRF-27210G, 4
Monel, 47

N
National Fire Protection Association (NFPA), 119
NFPA-50, 66, 74, 90, 92–94, 96, 111
NFPA-51, 90, 96
NFPA-53, 16, 69, 96
NFPA-55, 65, 96
NFPA-68, 97
NFPA-70, 65
NFPA-220, 93
Nickel and nickel alloys, 28, 46–47
Nickel-copper alloys, 28, 46–47
Nickel-iron alloys, 47
Noncommercial transport equipment, 102
Nonmetallic materials, 49–50
Nonpropellant, bulk GOX and LOX storage, 90, 91t, 93

P
Pressurization and purge gases, 74
Portability, 84
Power, system failures, 89
Pumps, 84
Pressurization and purge gases, system failures, 89
Pumps, 84
Pressurization and purge gases, system failures, 89
Pumps, 84
Pressurization and purge gases, system failures, 89
Pumps, 84
Organizational policies and procedures
- oxygen use, 6
- project management, 123–125
- Overpressurization, 7, 89

Oxygen compatibility assessment, 53–56
- design, 57
- document assessment results, 55
- flammability assessment, 54, 54f
- kindling chain assessment, 55–56
- material selection, 55–56, 56f
- reaction effect assessment, 55, 56f
- worst-case operating conditions, 54

Oxygen-deficient environment
- injury within, 8
- OSHA definition, 5

Oxygen detection, 97

Oxygen-enriched environment
- fire protection systems for, 97–98
- injury within, 8
- OSHA definition, 5

Oxygen-enrichment, 89

Oxygen systems
- data, 27–35, 28
- test method, 28, 37f

Oxygen systems considerations
- basic safety, 3–4
- clean assembly, 84–86
- design considerations for installations, 70–74, 71–72f
- emergencies, 6–8
- fire hazards inherent in, 16
- handling hazards, 3–4
- hazard considerations, 72
- importance of cleaning, 4
- LOX piping system design considerations, 73
- LOX vessel considerations, 72–73
- maintaining cleanliness, 86
- organizational policies and procedures, 6
- personnel protective equipment, 5
- personnel training, 4–5
- principles for safe use, 3
- purity requirements, 4
- safety reviews, 5–6
- safety standards, 117–121
- warning systems and controls, 5

P

Packaging, 84

Paramagnetism, 104

Particle impact, 9, 10f, 11f
- data, 25, 26–27f
- design, 61–62, 62f
- test data, 25, 25f

Personal protective equipment, 77

Personnel
- operating procedures, 87
- protective equipment, 5, 76
- training, 4–5, 123

Physical properties, 103–104, 103r

Pickling, acid cleaning, 80

Pig cleaning, 79

Plastics, 49

Pneumatic impact of nonmetals
- data, 38, 39–40f
- test method, 38, 38f

Policies and procedures, 124–125

Precleaning, 82

Preliminary design review (PDR), 129

Pressure, 85

Pressure, storage of GOX and LOX, 4

Pressure relief devices, design, 69–70

Pressure vessels, 112–116

Pressurization and purge gases, LOX, 74

Professional societies, codes, regulations, and guidelines, 119

Project management, 126–129

Promotedignition combustion transition (PICT), 16–17, 17f, 18–21f, 21f

Promoted ignition of metals in GOX, 16–17

Propellant, 4

barricades in test areas, 98

bulk LOX storage for, 90–92

definition of explosives, 92

storage tanks and impounding areas, 95

Protection policies, 125

Quality control, 125–126

Quantity-distance guidelines, 90–92

Reaction effect assessment, 55, 56f

Resonance, 15, 15f, 46, 66–66

Restricted alloys, 48–49

Rinsing, 82

Risk management, fire, 53, 54f

Risk training, 57

Rollover, 95

SAE ARP 1176, 76, 81

Safety analysis report (SAR), 130

Safety assessment review (SAsR), 130

Safety guidelines, 3–8

Safety reviews, 5–6, 131

Scaling laws, 120–121

Seal assembly, 85

Seal configurations, 69f

Seal extrusion, 59

Sealing interfaces, 59

Silicone, 59–60

Society of Automotive Engineers, 119–120

Soft goods
- assembling seals, 85
- cleaning solvents and, 81
- design principles, 59–73
- friction, 13

Solubility, 104–105

Solvents, 81

extraction, 83

Stainless steels, 48

Standard operating procedures (SOPs), 123

Static discharge, 13–14, 46, 65

Steam cleaning, 80

Steam configurations, 68f

Storage vessels, 95

Subsonic particle impact tests, 27f

Supersonic particle impact tests, 26t

Surface preparations, 59

Surface tension, 105, 106f

Swab, spray, and dip cleaning, 79

System safety program plan (SSPP), 130

T

Tank ruptures, 121

Technical and trade groups, codes, regulations, and guidelines, 119

Temperature, storage of GOX and LOX, 4

Testing standards and safety groups, codes, regulations, and guidelines, 119

Test readiness review (TRR), 131

Thermal insulation, LOX system, 74

Thermal runaway, 15

Threaded assembly, 85

Toxicity
in breathing gas systems, 49

cadmium, 48

fire-extinguishing agents, 98

hazard reviews, 133

magnesium, 48

materials, 50

oxygen, 3, 104

Transportation, 101–103

emergency, 6, 103

general operating procedures, 102

public thoroughfares, 101–102

site-controlled thoroughfares, 102

Tumbling, 79

U

Ultrasonic cleaning, 79

US Coast Guard, National Response Center, 7

V

Vacuuming and blowing, 79

Valves, 67–68, 68f

Vapor pressure, 104–106f

Ventilation, cleaning, 77

Ventilation and disposal systems, 96

W

Warning systems and controls, 5

Water break test, 83

Welded soldered and brazed joints, 85

Wipe test, 83

Wire brush or grinder cleaning, 79
